Introduction of the W+W Consulting GmbH.

Services

The W+W Consulting GmbH is a specialized management consultancy, which increases the quantitative and qualitative value creation of their customers – using the latest methods and ERP and BPMN technologies, preferably Aeneis and SAP.

Target group

The W+W Consulting GmbH has profound know-how in the food sector for production, trade and logistic processes and in the automotive sector including production, supply and engineering.

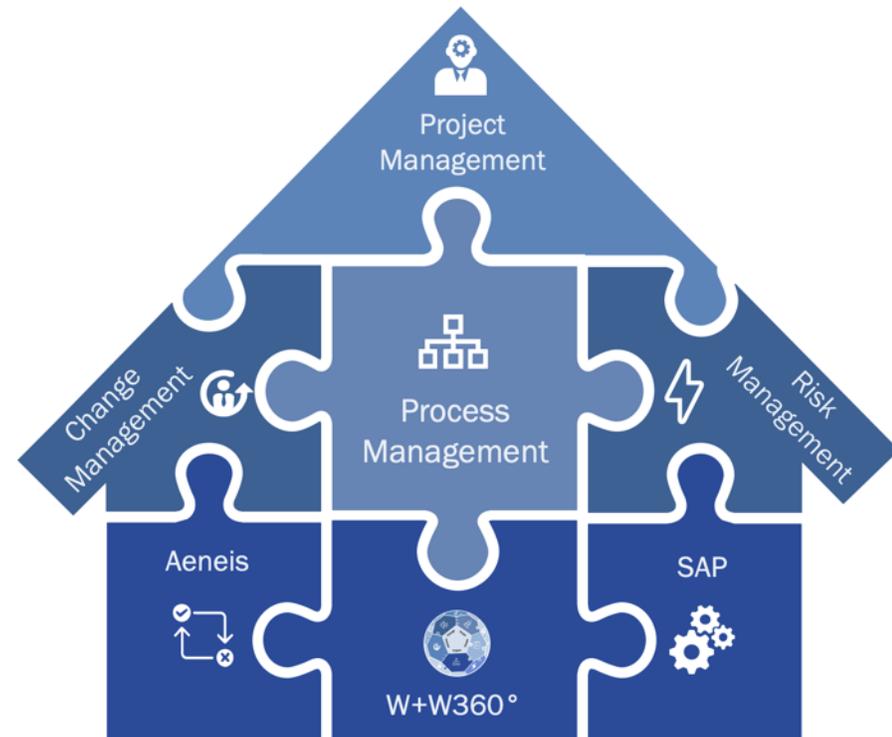

Mission & Vision

The W+W Consulting GmbH wants to be an excellent employer, a reliable partner and a highly capable service provider – with vision, efficiency and effectivity.

W+W services

We are a specialized management consultancy for food, retail and consumer goods, as well as automotive and engineering, which increases the value creation of their customers - using the latest methods and technologies.

With foresight, reliability and passion, we create innovative customer experiences by thinking and acting strategically and entrepreneurially. At the same time, we are dynamic, empathic and capable of implementation - at every level in the company.

W+W-360°Service

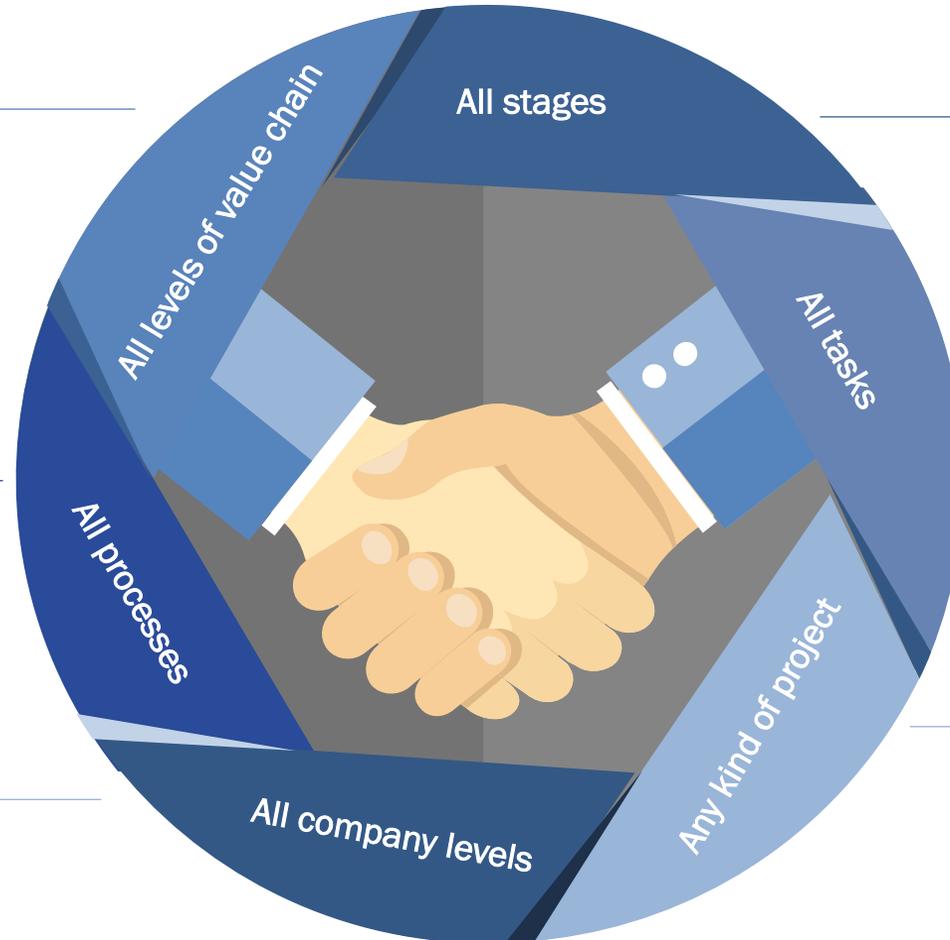

We combine in-depth expertise and best practices at all levels of the value chain in our core industries: Food, Retail, Automotive & Engineering

We master the management, core and support processes of manufacturing companies end-to-end, especially for food and automotive industries.

As trusted advisor, we communicate honestly, transparently and objectively at all levels of a company

We support our customers from the technology decision, through planning, implementation, Go-Live and after the productive start with project consulting and management.

We cover all core project tasks for our customers: project management, change management, process management and risk management.

We master all types of projects, from implementation to development and integration projects at all project sizes. In addition, we also step into assists to recover from project failure.

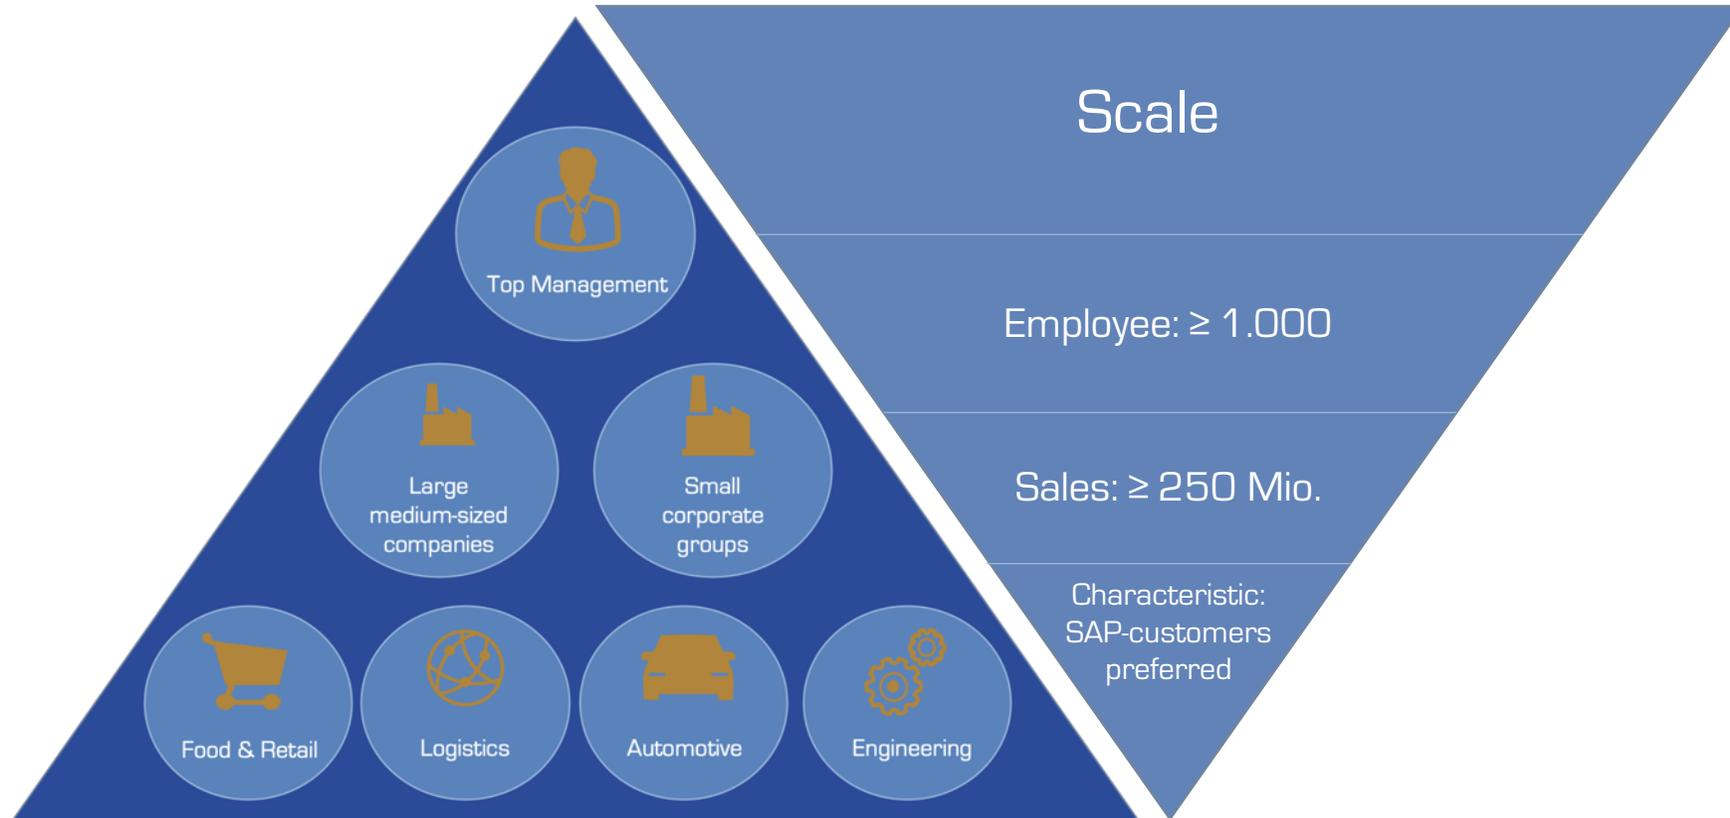

W+W target group

W+W unites effectiveness & efficiency with specialist knowledge and profound industry expertise in food, retail and consumer goods as well as automotive and engineering. Together with top management, we analyze the status quo, develop a strategy, plan its implementation and lead it to the desired result.

We vouch for the guarantee of success, no matter whether we lead or accompany the project from the very beginning, support during the process with optimizations or are even be called to step in when the project has already failed.

W+W target group

Automotive sector

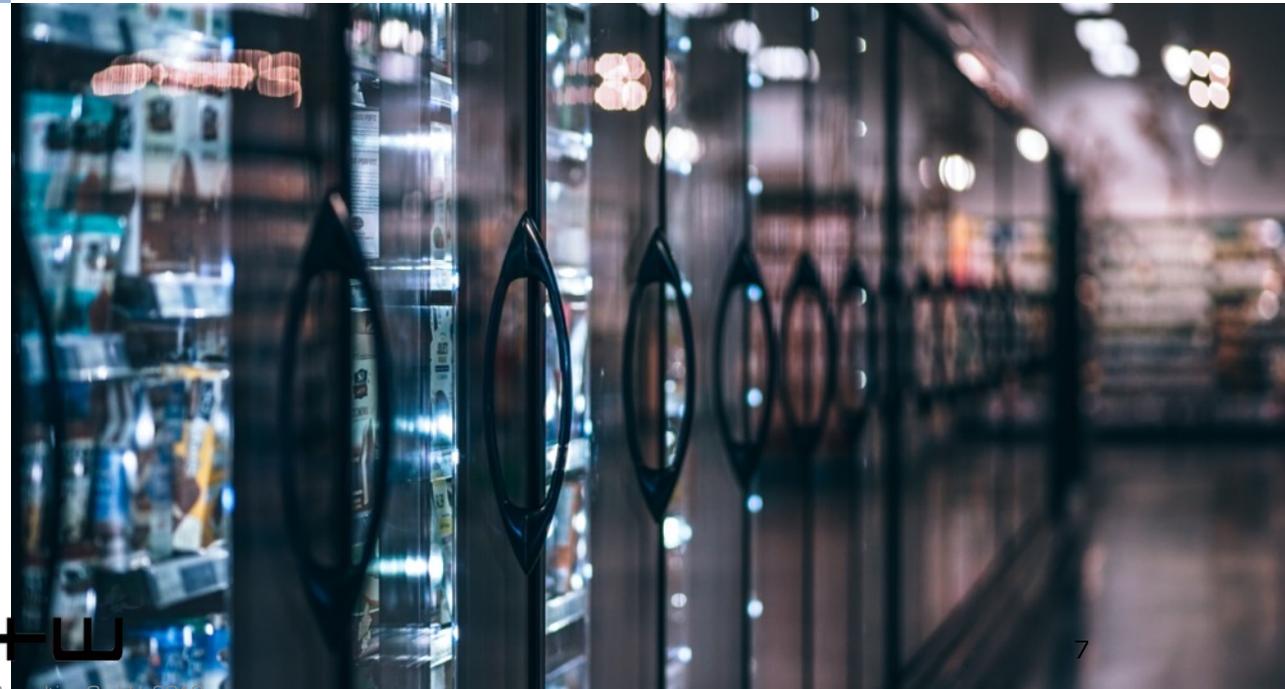

The automotive industry, including OEMs, suppliers and mechanical engineering is characterized by the following challenges: Just-in-time and just-in-sequence production, continuous traceability, high quality standards, quantities and competitive pressure, strong international delivery commitments, extremely high development costs.

We want to master these challenges together with you.

Food sector

The food industry, including food production, food trade and food logistics, is characterised by the following challenges: continuous traceability, high quality standards, perishability of products, seasonal influences and high competitive pressure.

We want to master these challenges together with you.

Mission & Vision

Excellent employer and partner as trusted advisor for top level management for transformation and digitization projects.

Creating customer experiences with foresight, reliability and passion through the sustainable increase of added value.

2025

Growth for W+W and our customers

Innovation and technology leader in the areas of process, project, change & risk management, especially for Aeneis and SAP S/4HANA.

Organic growth for our customers and for W+W: turnover, employees, range of services and customer base.

Our Plus, Your Plus.

- + We enjoy the trust of big customers such as Bosch, Westfleisch and heristo.
- + We have over 30 years of experience in food, retail and consumer goods, as well as automotive and engineering.
- + We advise a company holistically - from planning to implementation and beyond the Go-Live.
- + We are a carefully selected team that connects with your company in a short time.
- + We combine high technological competence for BPM and ERP systems, especially for Aeneis and SAP, which harmonize with each other via the SolMan 7.2 interface; perfect for greenfield and roll-out projects.
- + We help you in every phase of the project: at the beginning, in the course and at the end for optimizations; but also, if the project has already failed.
- + We identify with your customers at all levels in the organization.

Thank you for your interest.
